

# Crescent Moon Chandeliers

## CHANDELIERS ON CURVED ARCHES

FOR WEDDINGS & EVENTS

## Chandelier lighting, wherever you want it

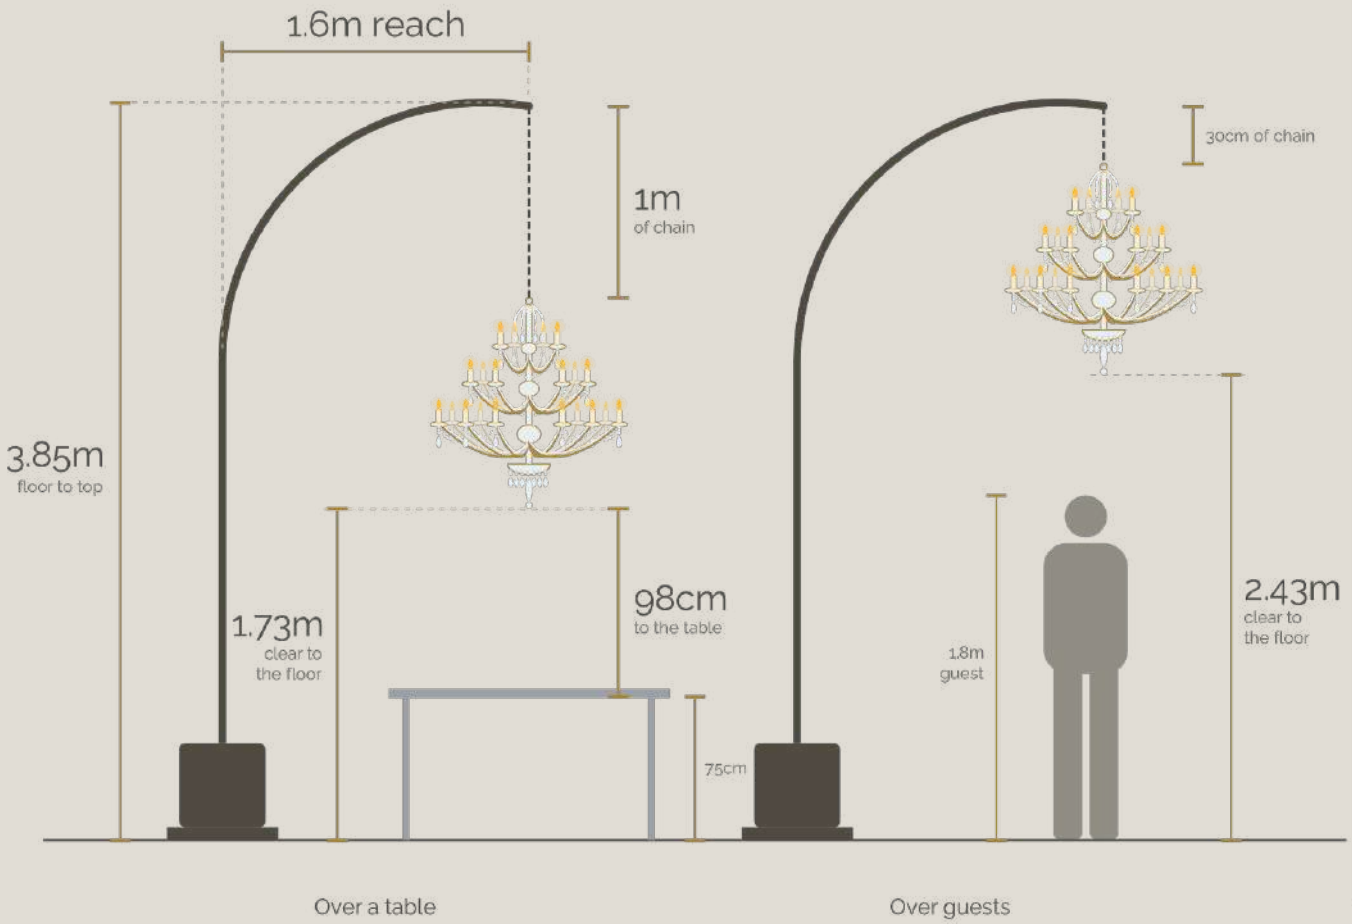

Our curved arches let you hang a chandelier over a dining table, down the aisle or out in the garden, without fixing anything to the ceiling.

That makes them perfect for historic venues and spaces with no available rigging points. The tallest stands 3.85m with a 1.6m reach, and shorter uprights work in low rooms.

Each arch takes a chandelier of up to 15kg. They run on battery or mains, and on battery there's no cable across the floor.

## Arch sizes

Over a table and over guests, drawn to scale

### Built sizes

Tallest measured on a real install

Height
3.85m floor to top

Shorter uprights
From 2.5m, over tables only, never where guests walk

Reach
1.6m from pole to chandelier

Base plate
58 x 58cm, about 20kg

Upright and arm
Arm 1.5m across x 1.3m high, 20 to 25kg with the upright

Weights
5 x 20kg, under a black cover

Power
Battery or mains

Over a table (measured)
1m of chain left 1.73m to the floor, 98cm above a 75cm dining table.

Over guests
30cm of chain leaves 2.43m clear to the floor.

## Where our arches have been

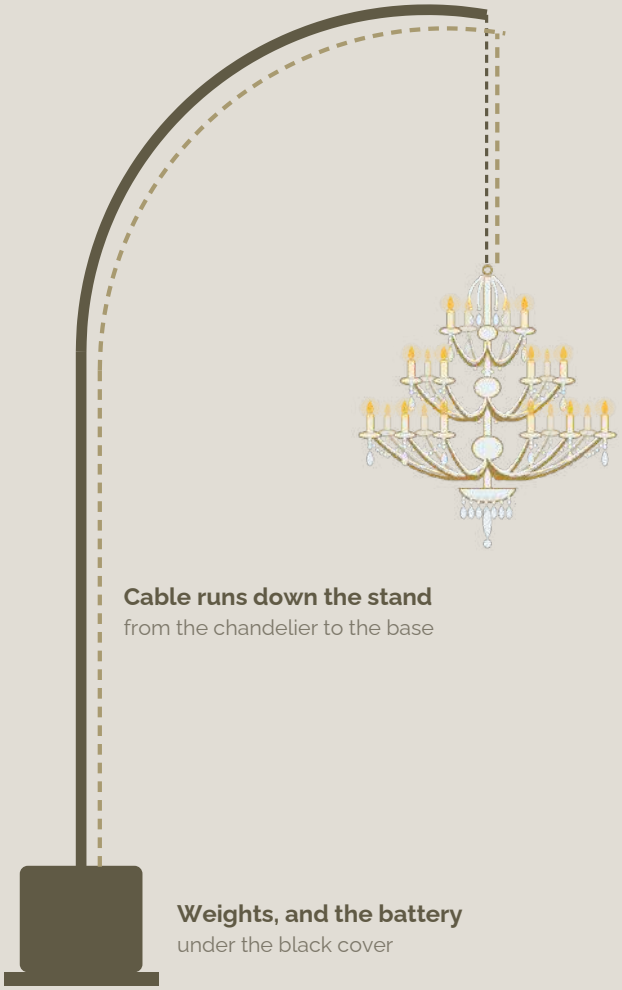

A selection of venues from 2026

- Kensington Palace Orangery
- Westminster Abbey
- Claridge's
- Cunard Building, Liverpool
- Syon Park
- Babington House
- Four Seasons Hampshire
- Avington Park
- Peckforton Castle
- Dundas Castle
- Grantley Hall
- Coworth Park
- Euridge Manor
- Tofte Manor
- Great Haseley
- Cornwell Manor
- Heron Lodge

# Planning your arches

Power, and what we need from you

## Power

Battery or mains, whichever suits the venue.

Battery: hidden under the cover, with no cables across the floor.

Every battery leaves us fully charged, and spares can travel with the kit.

Mains: our own cable runs from the base to a 13A or 16A socket.

## What we need from you

Completely flat ground under every arch. Grass or gravel is fine.

Your ceiling height, so we can choose the right upright.

Your final table plan, so we know where each arch goes.

Whether the arches are indoors or out.

# Before you book

Wet weather, finishes, ground and heights

## Wet weather

Our waterproof Marie Therese 88 and Empire 90 can get wet and stay lit.

All other chandeliers are not set up outdoors in the rain.

If yours are not waterproof, please have an indoor plan.

What you book is what we bring: we cannot swap to waterproof on the day.

## Finish

We cover the metalwork in black, white or gold socks as standard.

Other colours are available on request.

Please choose when you book, so we can have them ready in time.

## Ground and heights

Arches can stand on grass or gravel, but the ground must be flat.

There can be no slope at all, as an arch on a slope can tip over.

Shorter uprights, from 2.5m, go over tables only.

Wherever guests walk underneath, we use the tall arch.

# Crescent Moon Chandeliers

We would love to hear about your event.

Call or email us to book.
